

3015H Laser Cutting Machine

with Double Exchange Platforms **1.5-12kW**

 Intelligent negative-pressure dust removal

 Double exchange platforms

 720° all-round safety monitoring system

 Less freights, assembly & disassembly costs

This is a classic model in SENFENG. After technical upgrades, the machine has been outfitted with many self-developed core components. It always keeps stable at work and is in great favor as one of the best-selling machines.

1 Cut Thin, Medium and Thick Sheet

In our self-developed CNC system, the fly cutting, obstacle avoidance at idling as well as leapfrog of cutting head are provided. Due to its instant response, the machine works at lightning-fast speed.

Cut thick sheet stably: **40mm**
Max cutting speed: **55m/min**

2 Three Self-developed Core Components

We develop core components including but not limited to those below. The highly matched suit is featured by fast response, high interconnection, low failure rate and easy maintenance.

SF-Mimir LT
Intelligent control system

SF-PowerPlus
Laser generator at high stability

SF-TYRFING
Autofocus laser cutting head

Notes: These components also allow for other brands as you need.

3 Stand Out in Operating Speed

Its aviation-grade AL alloy beam has high dynamic performance even at high speed. On double exchange platforms, the cutting, loading and unloading run in parallel. With that, waiting time will be sharply reduced, so as to speed up your work.

Max speed: **130m/min**
Max acceleration: **1.2G**

4 Fast to Remove Smoke and Dust

To enable smoke-free effects, this model has fully-enclosed lift door, of which intelligent negative-pressure dust removal system can control air vents in real time.

Technical Parameters

Model	Laser power	Working area (L*W)	X/Y-axis positioning/ repositioning accuracy	Max speed	Max load of platforms	Overall dimensions (L*W*H)
3015H	1.5-12kW	3050*1530mm	±0.05/±0.02mm	130m/min	700kg	8450*2270*2260mm
